Children's Aid Token

WHITEPAPER

2022 / 03

Legal Disclaimer

IMPORTANT NOTICE

PLEASE READ THIS ENTIRE SECTION AND DO NOT TAKE ANY ACTIONS UNTIL YOU FINISH IT. THIS WHITE PAPER IS A SUMMARY OF $CAT's BUSINESS MODEL, TECHNOLOGY, AND BRIEF INTRODUCTION TO CHILDREN'S AID TOKEN PRINCIPLES.

Purpose

The purpose of this whitepaper is to present the Childrens Aid project in connection with the Childrens's Aid Token ($CAT). The project as described in this whitepaper is under development and is being constantly updated including but not limited to technical features, token behavioral model, etc. The Children's Aid Token Team reserves all the rights to add, delete or modify any of the information in this document.

Regulatory status not assured in all jurisdictions

Children's Aid Token intends to operate in full compliance with applicable laws and regulations and obtain the necessary licenses and approvals in key markets. This means that the development and roll-out of all the features of the $CAT token and the Children's Aid Token project described in this whitepaper are not timed guaranteed. Regulatory licenses and/or approvals may be required in certain jurisdictions in which relevant activities may take place. It is not guaranteed, nor any assurance is given that any such licenses or approvals will be obtained within a particular time frame, or at all. This implies that the Children's Aid Token platform and other features of the proposed Childrens's Aid Token ($CAT) may not be available in certain markets, or at all. This could require restructuring of that ecosystem and/or its unavailability in all or certain aspects.

In addition, the development of the platform is intended to be implemented in stages. During certain stages of development, the platform may rely on relations with certain licensed third-party entities. If these entities are no longer properly licensed in the respective jurisdiction, this will impact the ability of the Children's Aid Token platform to engage with that party, including its services and functions.

Contents

Introduction

Generally, Children's Charities and Associations assist in the protection of babies, children, and adolescents who are victims of abuse or who are in danger of becoming victims of abuse, whether it be physical, emotional, sexual, or the result of neglect or abandonment. They also give aid to families that need more assistance and support. Making sure children can remain with their families while being safe and thriving is a top priority for all Children's Charities.

Families are frequently confronted with challenges such as poverty, unemployment, addiction, mental health challenges, and insufficient housing, all of which can add additional pressures and complexity to their already stressful lives, impairing their capacity to provide for their kids. For example, a kid may well be suffering from neglect due to their family's financial and housing status, or the family may require children's support as a result of a parent's mental illness.

According to a World Bank analysis released in 2021, over 40% of all children under the age of primary school – or almost 350 million – require childcare but do not have access to it. As a result, an excessive number of children are forced to spend their time in hazardous and uninspiring situations. The COVID-19 epidemic has brought shortcomings in childcare services and the sector's susceptibility to the forefront of public debate throughout the world.

Investing in high-quality, affordable childcare is critical to removing barriers to upward mobility, assisting everyone in realizing their full potential, and advocating equity – which is an essential component of global economic growth and productivity, and its overall competitiveness.

The challenges encountered by society's most vulnerable groups have been more difficult to overcome during the past three decades as a result of rising inequality in various countries around the world. Children, in particular, are suffering as a result of this circumstance. The current situation of child vulnerability places emphasis on investing in the well-being of vulnerable children as a vital activity for achieving inclusive global development.

Factors Influencing Child vulnerability

Over time, multiple factors combine to make children vulnerable to abuse and neglect. For instance, children in poverty may also live in high-poverty neighborhoods where social capital and social cohesion are lacking. Children who are homeless face a variety of challenges, including housing insecurity as well as the mental health of their parents and the breakup of their families.

Young children are particularly vulnerable to the effects of domestic violence due to their critical period of development, high level of dependency, and increased concentrations of time spent in the home setting. As a result of a lack of financial resources, children with impairments may struggle to succeed in school.

Maltreatment affects children from all socioeconomic backgrounds, but those from low-income families are particularly vulnerable because they lack the necessary safeguards like a safe living environment, good educational and child care options, and strong social and family ties to keep them safe from harm. The interplay of elements that contribute to a child's vulnerability necessitates a holistic approach to well-being throughout infancy.

Disability

Physical, intellectual, communicative, and sensory impairments and chronic diseases impede the functioning of children with disabilities. Children with disabilities are heavily represented in institutional care and more likely to suffer abuse, especially neglect. Children with disabilities are more likely than non-disabled peers to live in low-income families and be bullied.

Depression and other mental health issues

Disparities in children's mental health can be traced back to social inequity. Two to three times as many children from poor socioeconomic settings suffer mental disorders as those from higher socioeconomic backgrounds. Parent-child transmission and a parent's lower socioeconomic status are also influences. More educated parents are better equipped to provide timely and specialized assistance to their children.

Immigration Factor

Immigrant children are a vast and increasing group. Factors like parents with less education and financial resources might impact their children's capacity to complete school. They also belong to fewer social networks in their host community, speak a different language at home than at school, and are more mobile than pupils without an immigrant background. Across countries, native-born pupils do better academically; the disparity between children of immigrants is greatest for children arriving after the age of 12.

Maltreatment

Poverty, living in a rough neighborhood, overcrowding, parental substance abuse and intimate partner violence are environmental risk factors for maltreatment. It's tough to identify children at risk because many aren't maltreated. Individuals and society suffer long-term economic costs of maltreatment. Growing children that have been maltreated are less likely to be educated, earn less, and possess less.

Why $CAT

Since the inception of blockchain technology, looking around, you will find various projects created to support dogs, cats, and even wild animals like bears, whales and gorillas. While these are impotant issues we believe that children in need of financial support are equally deserving of our help.

- What about our children?
- What about children that do not have the opportunity to select their path in life?
- What about the children that die of hunger? (Something that should not happen in our century)
- What about children that have no chance of growing up with education for their basic skills?
- What about families that are willing to put their entire family lives on the line in order to achieve more excellent footing for a better existence?
- What about children that have grown up or are growing in abusive environments?

This is a question to our community; do you think this is fair? To us, it is not; that is why we create the Children's Aid project.

About $CAT

While there is a need to create a project that renders help to children's needs, it should be done in a practical, transparent and convenient way. The Children's Aid Project is a token-based project that makes use of blockchain technology to build a community of helpers and advocate charity donation to the cause of alleviating the suffering of less privileged children and families around the world.
The blockchain is the primary technology behind cryptocurrency.

Blockchain technology allows for transactions to be done without a central authority, relying instead on algorithms and encrypted data. The technology has found application in money related exchanges; however, new applications are entering the market daily. One of these new uses includes charitable donations.

Our Mission

Our mission is to invest in the future well-being of children in need to build stronger communities and a more prosperous economy for everyone. Children's Aid Token will be used for fundraising, donations, marketing campaigns, rewards programs, and more! We believe the $CAT Ecosystem can help us all make better decisions when providing aid to children in need. We aim through our projects to aid children and to maitain and grow a healthly environment using $CAT.

Charity

Community

We want to see a change, and we want to lend a helping hand to children and families in dire need of our support. We hope to have a good influence that will empower children to make decisions about their future.

We want to protect and support children and young people. We will accomplish this through financial support to charitable organizations, assisting them in providing practical and emotional care and support to children.

By doing this, we are working to make significant and long-lasting changes in their lives. We believe that every child and young person has the right to access a secure and happy childhood and the foundations that will enable them to succeed in life.

Our commitment to the growth of our community and tokens is as essential as our charitable efforts. We will be unable to undertake charitable work until we have a robust ecosystem that is driven by our community.

We want to see the **$**CAT Ecosystem become a reality, where **$**CAT will be used as a utility token. With the aid of the community, we can do amazing things. Also, we have a fantastic crew motivated by their belief in the project and parents concerned about the well-being of their children.

We have a lot of exciting ideas for the future apart of CATswap and CATmarket. News will be released on our official Twitter (@ChildrensAidT) channel.

Our Solution To Children Vulnerability issue

The combination of finance and technology in the form of cryptocurrency is a catalyst for positive change and a ray of hope. At Children's Aid Project, we are ardent supporters of crypto's potential to level the playing field and serve as a positive influence. A portion of our tokens will be continuously donated to organizations that help vulnerable children get an education, food, and shelter, among other amenities for better living.

With our global expansion, we recognize the value of charity and assisting the future generation, particularly those in low-income

Children's **Aid** Token

What is Children's Aid Token

The Children's Aid Token ($CAT) is a community-driven token with a global aim to assist children and their families in need. $CAT has been created to reward our community, aid in our charitable mission, and serve as a utility token within its ecosystem, among other purposes.

$CAT is a Bep20 token built on the Binance Smartchain Network.

Token Symbol **$CAT**

Token Type **BEP-20**

Max Supply **1 quadrillion - 1,000,000,000,000,000 (1000 trillions)**

Contract Address **0x1f941B4ec5325afD4Bbdb9495b1E6eCB1ff9E743**

Network **Binance Smart Chain**

Why Binance Smart Chain Network

Due to its low transaction fees, lightning-fast block speeds, and interoperability (network interactions), the Binance Smartchain network is the one we've chosen.

CATonomics

$CAT smart contract has been designed to charge a transaction fee of 9%. This will occur after $CAT has been listed on PancakeSwap rather than during the pre-sale period.

The following is how the fee will be distributed

Passive Income for holders

All $**CAT holders on decentralized wallets will receive 5% of the transaction fee from the** $**CAT smart contract.**

Maintain a Price Floor

3% of all transaction fees will be added to the PancakeSwap liquidity pool in order to maintain a price floor.
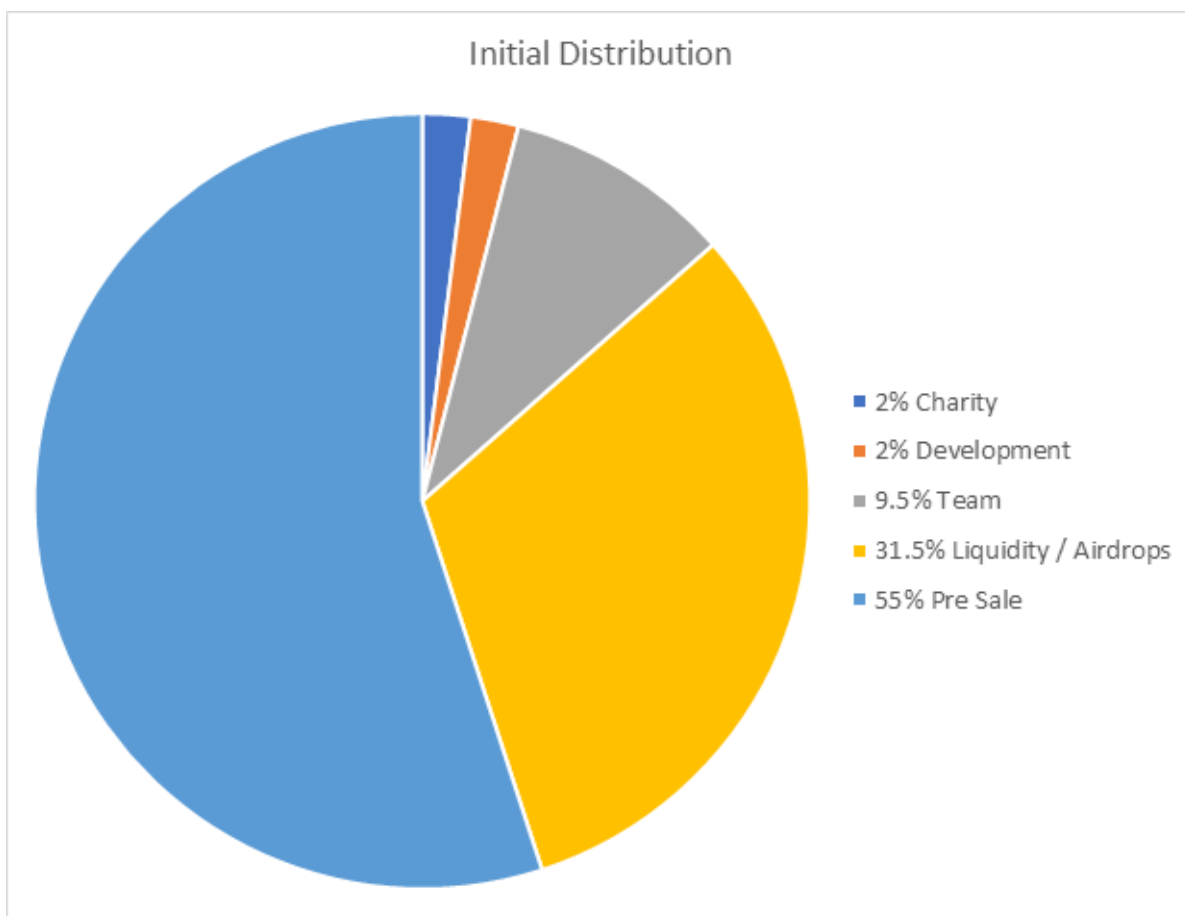

Helping charities

In our mission of assisting charities, 1% of every transaction fee will be transferred to the charity wallet.

Initial Distribution

Distribution Diagram

Initial Distribution

- 2% Charity
- 2% Development
- 9.5% Team
- 31.5% Liquidity / Airdrops
- 55% Pre Sale

Charity Distribution

We're are actively looking to start our collaboration with registered licensed organizations that offer fostering services world-wide. With introduction of $CATmarket will come our first charitable interactions.

The first donation will come from our 10k unique NFTs collection sale, where we expect to give regular support for the children for at least a year through the market. We also plan to give to charity from our NFT collections through the market. 2% (20,000,000,000,000 trillion) of the original $CAT supply has been moved to the charity wallet: 0xCAF6E01961Bd9Cb8d-493087d5aF61906f4F86f71. Please feel free to donate any crypto on both networks, ETH or BSC, but please let us know so we can keep track of it.

We are developing a Charity distribution mechanism to have minimal impact on our token price. We will make public all charities donations.

$CAT Presale

Presale Page

$CAT token Presale is held on our website (https://childrensaidtoken.com/cat-presale/).

Why Presale

There are 3 main reasons we are conducting a presale for $CAT:

      1. To give our early investors a chance to bag $CAT at a much lower price before public sales (at the point which the price will surge)
      2. To create the much-needed awareness in preparation for public sales.
      3. To raise funds that will support the development of project's next stages.

How Presale works

The smart contract for the $CAT presale is timed. If we cannot raise the desired amount, we may be obliged to conduct another public presale.

We are offering to the public a massive 55% of the total token supply, giving the community an early opportunity to purchase the token at a lower price. During pre sale, no fees are collected from the buyers. On top of it, we offer a woopping 20% additional $CAT tokens for free on every transaction.

In exchange, we intend to raise 1250 BNB, which will be used to offer token liquidity, assist with the development of CATswap, and fund paid marketing campaigns.

Referal Program

On our referral program, we will offer 1% of the transaction amount in BNB, straight to your wallet.
Once you login with metamask on our presale page, you will have a unique URL or QR code, that you can use to share.

Fund Allocation After Presale

60%	20%	20%
Liquidity	**Marketing**	**CATswap Launch**
60 % of the funds raised we will provide liquidity on pancakeswap	20% of the amount will be used for paid marketing campaingn to increase our holders community and to promote CATswap.	20% of the funds raised after presale will be used for Intensive CATswap launch preparations, including audit and legal advice together with adding new features.

Social / Charity

"Being emphatic is the medicine the world need"

Alex Riglea

Social / Charity

Social guru and soft heart for our cause

Robert Bita

Software Engineer

Crypto currency self tought developer and a great father

Worldwide Collaborations

Several Subjects

We are constantly expanding our team and collabarate worldwide for diferent $CAT projects

Near Future

Our future plans are not limited to those below, on the contrary we aim to fulfil these promises and add new exciting features.

CATSwap

NFT CATmarket

CATstack:

- Rewards in a new Token (Children's Aid Future $CAF) and/or Rewards in BUSD

CATexchange

- exchange your BSC tokens

CATpool

- allow users to provide liquidity pairs for any BSC tokens and get rewarded

- allow users to create pairs with $CAT token and get rewarded

CATollections

- Our 1st 10k unique NFT collection

CATfoster

- Fostering online. When buying an NFT will sponsor a child in need for a year or so, depending on the costs of the fostering process. The NFT holder will have the option to remain anonymous towards the charity, child or child family. Otherwise the charity will contact the NFT holder with further details. This line of NFTs will represent something specific of the child.

CATartists

- A place where NFT artist can share/sell their children artwork

- CAT artists contests
